

MATSUURA USA ANNOUNCES PARTNERSHIP WITH CMD-CUSTOM MOLD AND DESIGN

CMD-Custom Mold and Design (Forest Lake, MN) and Matsuura USA (St. Paul, MN) are collaborating in applying the Matsuura LUMEX technology for the mold industry. CMD will also offer contract Matsuura LUMEX production on the company's LUMEX Avance-25 Metal Laser Sintering Hybrid Milling Machine, a powder bed metal AM platform with subtractive machining capability.

Custom Mold and Design is the industry leader for designing and building high-precision, fast cycling molds, machine components, and fixtures.

Serving a wide range of industries including medical, aerospace, consumer products, and electronics, CMD provides a single source for molds, maintenance, fixturing and machined component needs.

CMD has a proven track record of manufacturing molds that run tens of millions of cycles. The company has designed and manufactured thousands of molds since its foundation in 1965. The average employee at CMD has over 20 years of industry experience.

Designers at CMD are highly experienced with a dedicated interest in their customers' needs. They understand the demands of today's exacting tooling requirements and their attention to detail and manufacturing disciplines create high-precision components. Learn more at: custommold.net

Matsuura's cutting-edge technology is transformative in today's world of 3D Metal Additive Manufacturing. With the combination of best-in-class CNC Milling and high-speed Direct Laser Melting, Matsuura has fundamentally revolutionized the AM marketplace. Matsuura's unique combination of technology platforms enables the production of parts and component geometries in a method that has never been possible nor imagined.

Instead of starting from a block or some other traditional geometric shape, with the Matsuura LUMEX, the designer now can begin with a blank page and "grow" their designs for lightest weight, sleekest design and most efficient use of material. The Matsuura LUMEX permits freedom of design never seen in the manufacturing world.
