

Company Backgrounder

With the experience and resources in design support, tool design and manufacture, Custom Mold & Design is your trusted partner. Custom Mold & Design is the industry leader for designing and building high-precision, fast cycling molds, machined components, and fixtures.

About Custom Mold & Design

For over half a century, Custom Mold & Design has built a strong reputation for earning the trust of the most challenging and discerning customers in the industry, one mold at a time. We take immense pride in our role as a premier leader in the design and construction of cutting-edge, fully interchangeable, fast-cycling, and high-precision injection molds. Our extensive expertise encompasses a diverse array of molds, such as multi-cavity, two-shot, metal injection, silicone, micro-molds, and ceramic molds.

Our experienced craftsmen work with the best machinery, tooling, and software, to provide you a single source for all of your molds, maintenance, fixturing, and machined component needs. Our unwavering commitment to excellence has made us a preferred choice for customers seeking expert solutions for their intricate tooling and mold component requirements.

We serve a wide range of industries including medical, aerospace, consumer products and electronics. Our experienced craftsmen work with the best machinery, tooling, and software, to provide you a single source for all of your molds, maintenance, fixturing, and machined component needs. Custom Mold & Design is a mold maintenance provider, ToolingDoc certified, ISO 9001:2008 certified, AS9100C certified and ITAR registered.

History

Custom Mold & Design was founded in 1965 for the purpose of manufacturing plastic injection molds. A high quality product, superior service to the customer and a dedication to the well-being of each employee has always been our goal. Today we continue to operate under that same philosophy and ideology. We employ the very best, highly dedicated engineers and mold manufacturers with combined industry experience in excess of 1000 years!

In 2023, Custom Mold & Design proudly join forces with Teamvantage through an acquisition. This collaboration empowered us to deliver comprehensive, fully integrated turn-key manufacturing solutions to our valued customers. Custom Mold & Design founded CMD Precision Machining Group (PMG) in 2008 with a dedicated focus on machined components, fixturing and contract manufacturing.

As part of our 50th-anniversary celebration in 2015, Custom Mold & Design relocated to Forest Lake, Minnesota, into a newly renovated, 40,000 square-foot state-of-the-art facility. The new facility was thoughtfully designed to enhance our manufacturing capabilities, efficiency, and overall operations.

Last year marked the exciting launch of our parent company. We are proud to introduce Velocity, the embodiment of our united family of brands and the comprehensive range of services we offer, all under one umbrella. Velocity brings together Teamvantage, MMD Medical, Custom Mold & Design, CMD Precision Manufacturing Group, and Paradigme Engineering, allowing us to streamline our operations and serve our clients with even greater efficiency and expertise. With this integration, we are well-

equipped to deliver innovative solutions, unmatched quality, and exceptional customer experiences across the spectrum of our offerings.
